

MASTERPACK

# KITS & SPECIALS

## BENEFITS:

*Configure orders to specific requirements*

*Ensure the customer receives "complete" order*

*Maximise value of an order*

*Allows assembly and kitting of products*

Masterpack gives the user the ability to configure orders to a customer's specific requirements. This flexibility in the handling of inventory leads to higher levels of customer service.

Masterpack kitting is used for the assembly of products, and has the ability to estimate the finished cost of a kit through kit estimates.

There is also the ability to disassemble a kit, which is usually done to salvage re-usable components after the finished goods have been returned.

## FEATURES

### ITEM FAMILIES

- Associate products together in Sales and Purchasing.
- Enter family code to view all items in family
- Tag required items
- Sales order can be automatically built

### SUPERCEDED ITEMS

When Inventory items are superseded by newer items, Masterpack can:

- Sell superseded stock first or switch immediately to new stock
- Transfer demand from superseded item onto new item
- Develop a chain of superseded items for tracking purposes

### KITS

- Explode Kits on an order to display their individual components
- Add-on products can be associated with kits and can be offered to the customer
- Develop kits "on the fly" and add custom descriptions to these kits
- The ability to raise a kit, build and confirm the raw materials
- Kit estimates allow for full cost analysis before building
- Kit disassembly allows un-building of kits back to components
- For regular kits, Bill of materials can be used for components and labour
- Tracking of kits in progress

**FLEXIBILITY, FUNCTIONALITY, INTEGRITY, SIMPLICITY**

## COMPANION ITEMS

- Companion items to be associated with specific product codes.
- The system will display a list of companion items which can be offered to the customer
- Companion items can be ordered directly from the order entry screen with quantities specified by the operator.

## SELL- UP PATHS

- A product code with an associated sell up path will prompt the operator with alternative products that can be offered
- Customised script for use by operators

## FRANCHISES

- Allows for specific products to be only sold to certain customers

## SECTION MODELLING

- Allows for products on a customer invoice to be grouped in a logical way to the customer

## TEMPLATES AND MERGING

- Customer order templates can be used for regular orders
- Merging information into a sales order can be done via an existing order, purchase order or quote
- Sales orders have an optional quick build facility

## INTEGRATION

- Specials are included in the Inventory module
- Kits are included in the Sales module

## THE COMPANY

Meier Business Systems (MBS) is an Australian owned company that has been providing a broad range of computer support services and products since 1987.

MBS offers outstanding skills in operating system, hardware, database and network support. These skills complement MBS's activities in the application software development arena and together with a range of open systems and storage solutions, form the primary focus of all MBS systems integration and support activity.

MBS provides ERP and Supply Chain solutions that are leading edge and widely accepted throughout the
