

MASTERPACK

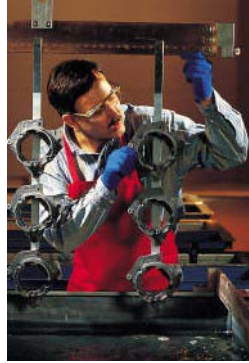

PRODUCTION

BENEFITS

Control production within the one system

Control both inventory costs and work in progress

Overheads direct to a General Ledger

Masterpack Production allows for the building of products based on components and sub-assemblies, with the ability to include both labour and overheads in the finished cost. Production is used by companies that do more than simple kitting. Masterpack production works efficiently with Project costing to control large or costly jobs through the factory floor.

FEATURES

- **Bill of materials**, which contain components, sub-assemblies, labour, instructions, overheads and by-products
- The ability to have optionally **customised Bill of Materials**, which will allow you to optionally add certain components when raising the work order
- **Bill of Material where used** function to trace where components are used
- The ability to **track costs** (standard v actual)
- The ability to **link a factory order to a sales order** and to view the factory orders as incoming stock
- **Project costing module** provides better traceability
- Factory orders can be optionally **generated out of replenishment**
- Inventory count is available for **stock count of WIP** when required
- **Multi-stage production** and **sub-assembly** processing
- **Materials Requirement Planning** and forecasting
- Ability to handle **direct G/L costs** for factory overheads and levies

FLEXIBILITY, FUNCTIONALITY, INTEGRITY, SIMPLICITY

EXECUTIVE INFORMATION SYSTEMS

- Production User Report Writer
- User transaction Reports
- Enquiries

INTEGRATIONS

- Integrated to Microsoft Office products
- Integrated to MITS Data Modelling for in-depth analysis of warehousing data
- Integrated to fax and email

THE COMPANY

Meier Business Systems (MBS) is an Australian owned company that has been providing a broad range of computer support services and products since 1987.

MBS offers outstanding skills in operating system, hardware, database and network support. These skills complement MBS's activities in the application software development arena and together with a range of open systems and storage solutions, form the primary focus of all MBS systems integration and support activity.

MBS provides ERP and Supply Chain solutions that are leading edge and widely accepted throughout the world.
